Running warehouse hoka bondi

Offering unparalleled protection mile by mile, the highly padded HOKA ONE ONE Bondi 6 is an everyday road running shoe designed for everyone from injury-prone runners to recovering elite racers. Other colours: Details: As the most cushioned road shoe in hoka's ONE ONE lineup, the HOKA ONE ONE Bondi 6 embodies the design philosophy of high pillow-to-weight ratio. This allows you to run comfortably from the impact forces without feeling overwhelmed. What's new The midsize has been modified to create a smoother ride and an improved under-the-leg feel. The upper has been re-designed to fit in while increasing durability and ventilation. The heel-hand has padding to provide a softer and more supportive heel lock. The outsole has been updated to reduce weight and optimize durability. The rocking chair-inspired geometries of the Bondi 6 midsole have been refined to help you transition to your toes at the ideal time for a smoother ride and perfect push. To complement the high-padded plantar feel, the upper of the shoe was reconstructed with comfort and support in mind. The mesh upper is designed for a plush walking experience while also providing ventilation at the top of the foot. This allows the heat to easily escape to keep your feet dry and irritation-free for miles to come. If you've suffered injuries in the past or are just more protective of your body from rough and repetitive impact forces, add Bondi 6 to the lineup. Model Number: 1019269-BBLC Weight: 10.8 oz (size 9) Stack Height: 37 mm (heel), 33 mm (Front leg) Available widths: D =Medium, 2E =Wide How It Fits (width based on D) Scaling: True to size Heel Width: Medium Midfoot Volume: Medium and High Box Width: Medium Toebox Height: Medium Arch Height: Medium MIDSOLE Soft EVA Midsole runs the overall length of the shoe to be 30% softer than traditional EVA foam, which provides increased cushioning and support. Early stage Meta-Rocker Geometry is a rockered mid-sized design designed to deliver a smooth ride and increased drive. OUTSOLE Full Ground Contact gives you more traction and smooth heel-to-toe transition. Hi-Abrasion Lightweight Rubber is strategically positioned for greater traction and durability. Heel bed works to increase ground touch and durability while creating a smoother transition to the front foot. UPPER Engineered mesh consists of the upper, which provides easy ventilation. The Lycra comfort frame in the corner provides comfortable support. The inner corner counter locks the corner into place and provides additional support.
